A PERIODICAL QUIZ - WHAT'S YOUR SCORE?

1. Do you realize that over 200 periodicals are available for circulation from the Atlanta Branch to USDA personnel?
2. Have you selected as many as you need in helping you to perform your job well?
3. If you need additional periodicals circulated to you, have you sent in requests on 3 x 5 slips - one for each title - with title of the periodical at the top of the slip and your name, agency, and address below?
4. Are you now receiving more magazines than you are able to read and digest? If so, wouldn't this be a good opportunity to weed them out?
5. Have you chosen a "balanced diet" - one that will make you more skillful on your own job, as well as help in the bigger job we all do together?
6. Are you satisfied when a periodical reaches you two or three months late?
7. If not, will you aid circulation by sending it to the next office on the routing list within the three-day loan limit? Please date and initial before mailing. By mailing promptly, the fellow at the end of the list will not get "stale news".
8. To give you complete coverage, do you see and check the Bibliography of Agriculture? Its subject index will assist you in finding articles in your field of interest and save time in perusing many magazines.
9. How many "serious" periodicals related to your work do you read? Enough?
10. Do you agree with the following excerpts from Philip McDonald's book Personality and English in Technical Personnel:

"Thomas Edison used to say ... technical workers did not read widely enough for their own good. He himself read dozens of serious periodicals from all over the world, whereas the average technician probably reads only one or two periodicals regularly, aside from the ephemeral dailies and light weeklies that most people glance at."
